As India continues to attract the attention of the world, AICC endeavours to strengthen India's international engagement globally and also work towards making AICC the first port of call for overseas delegations that wish to engage with India and for Indian industry that wishes to access traditional and emerging markets overseas.

The primary goal of the AICC is to undertake activities to connect Indian business with global business. AICC also works towards developing market access for Indian exporters; identifying and addressing the needs of the small sector to make it more competitive; promoting cooperation with counterpart organizations; adopting a proactive and partnership approach with foreign governments on various international issues concerning the Indian economy, among others. We, on a regular basis, organize International Events, Exhibitions, Seminars, Net-working Sessions with counterpart organizations, multilateral and academic institutions and other policy making bodies to build a strong Trade and Investment relationship between India and the rest of the world.
